Experiment 1 – Basic Kali Linux Commands

Aim: To execute basic user and directory commands in Kali Linux.

Commands

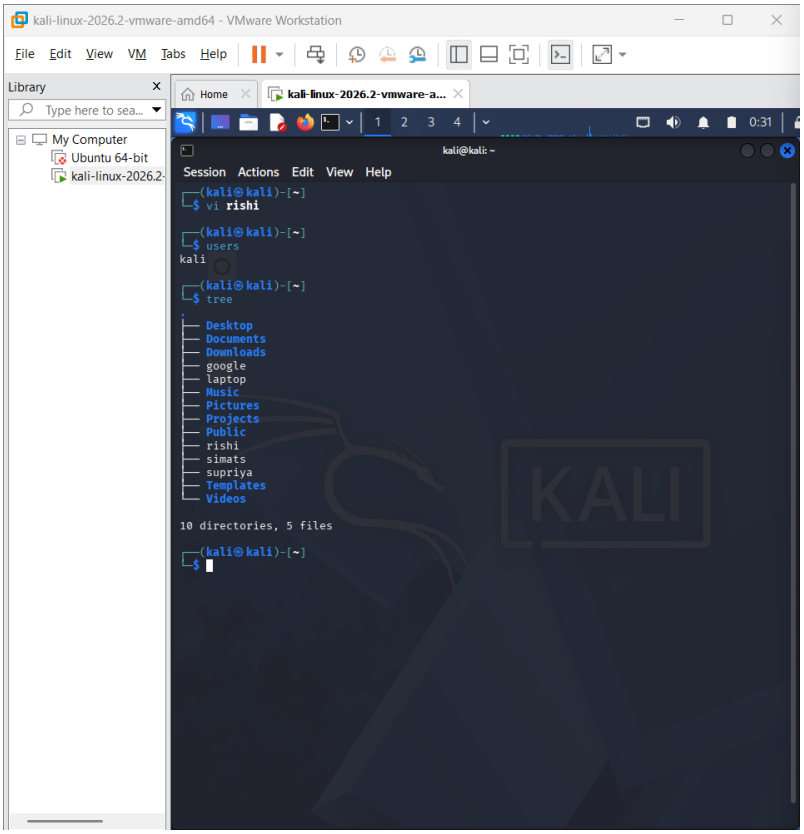

vi rishi

users

tree

Procedure

1. Open the Kali Linux terminal.
2. Type vi rishi to create or edit the file named rishi.
3. Save and exit the editor.
4. Execute users to display logged-in usernames.
5. Execute tree to display the directory structure.

Result: Successfully executed the commands shown in the screenshot.
