Experiment 2 – File Viewing Commands

Aim: To view and edit a file using Kali Linux commands.

Commands

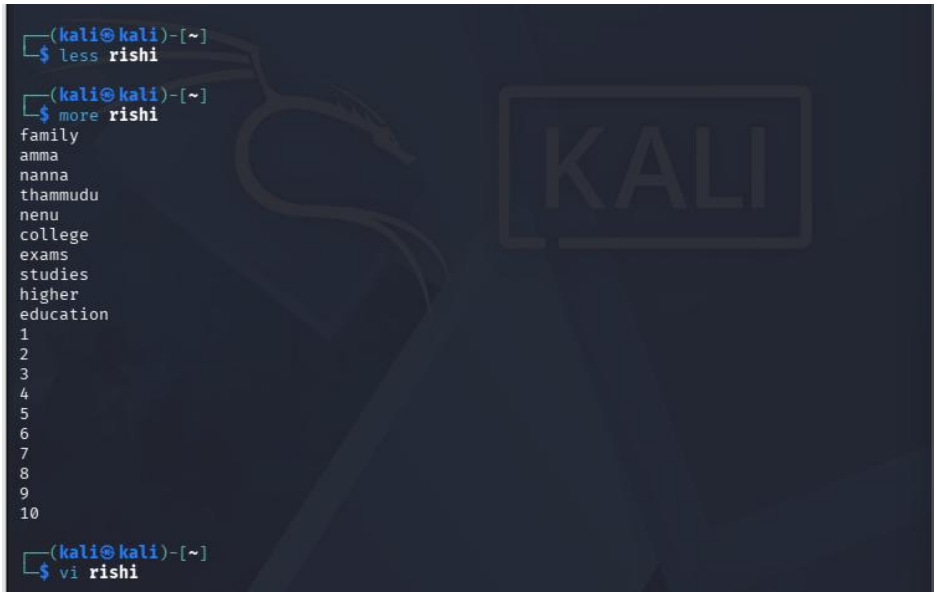

less rishi

more rishi

vi rishi

Procedure

1. Open the terminal.
2. Execute less rishi to view the file page by page. Press q to exit.
3. Execute more rishi to view the contents one screen at a time.
4. Execute vi rishi to edit the file.
5. Press Esc, type :wq, and press Enter to save and exit.

Result: Successfully executed the file viewing and editing commands.
