Experiment 5 – System Information and File Renaming

Aim: To display system information and execute the file-moving command.

Commands

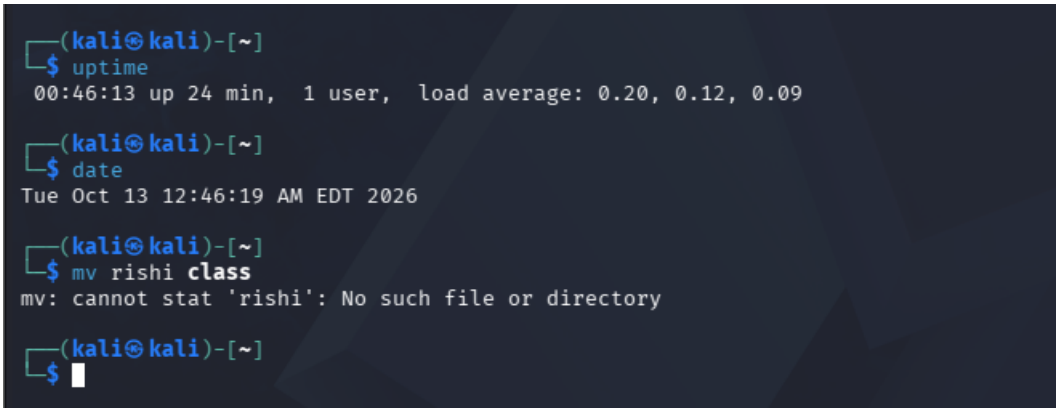

uptime

date

mv rishi class

Procedure

1. Execute uptime to display system running time and load information.
2. Execute date to display the current date and time.
3. Execute mv rishi class to rename rishi to class.

Result: Successfully executed the system information commands. The rename command requires the source file to exist.
